

Hand Detection

Create conda environment

```
Anaconda Prompt (Anaconda3)

(base) C:\Users\Asus-2020>conda create -n handdetection python=3.6
```

Environment created

```
The following NEW packages will be INSTALLED:

certifi      pkgs/main/noarch::certifi-2020.6.20-pyhd3eb1b0_3
pip          pkgs/main/win-64::pip-21.2.2-py36haa95532_0
python       pkgs/main/win-64::python-3.6.13-h3758d61_0
setuptools   pkgs/main/win-64::setuptools-58.0.4-py36haa95532_0
sqlite       pkgs/main/win-64::sqlite-3.37.0-h2bbff1b_0
vc           pkgs/main/win-64::vc-14.2-h21ff451_1
vs2015_runtime pkgs/main/win-64::vs2015_runtime-14.27.29016-h5e58377_2
wheel        pkgs/main/noarch::wheel-0.37.1-pyhd3eb1b0_0
wincertstore pkgs/main/win-64::wincertstore-0.2-py36h7fe50ca_0

Proceed ([y]/n)? y

Preparing transaction: done
Verifying transaction: done
Executing transaction: done
```

Activate the environment

```
(base) C:\Users\Asus-2020>conda activate handdetection
```

Environment activated

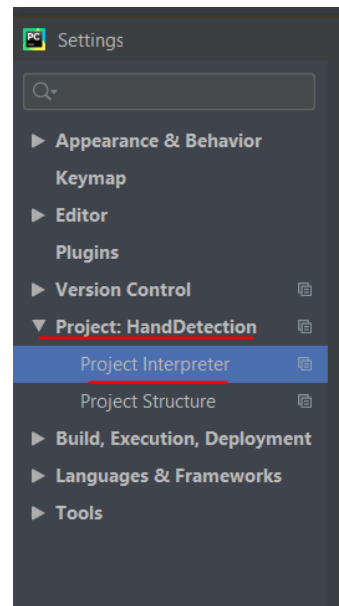

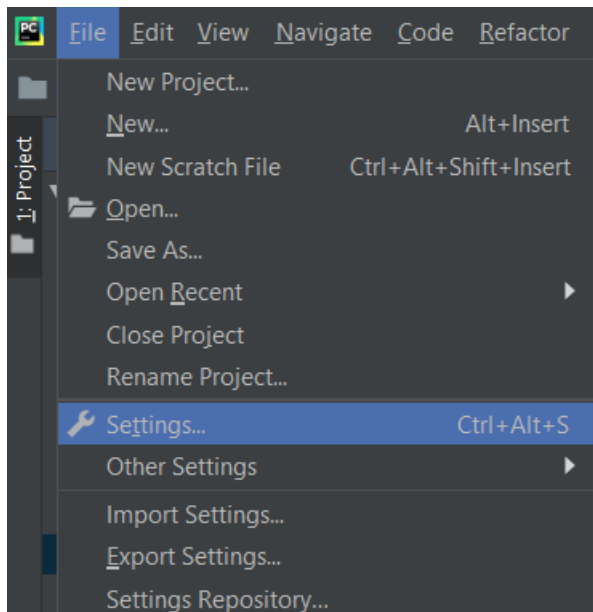

```
(handdetection) C:\Users\Asus-2020>
```

Configure the Interpreter in our IDE ( PyCharm)

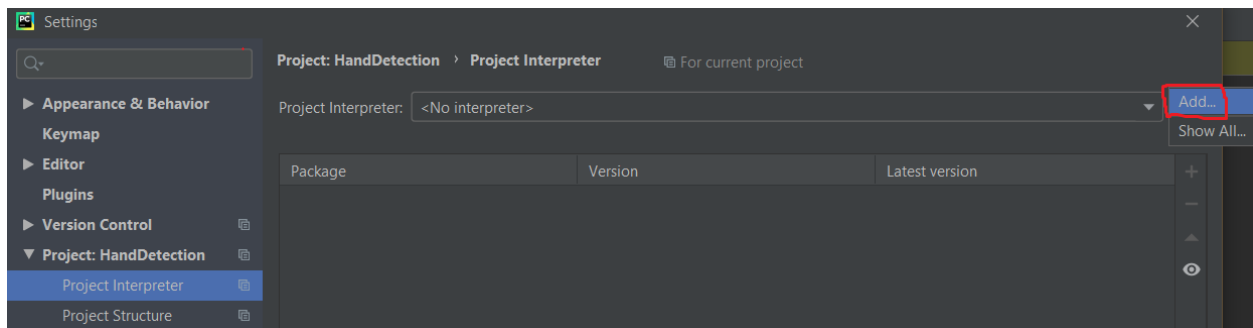

```
No Python interpreter configured for the project
```

Open the IDE (PyCharm)

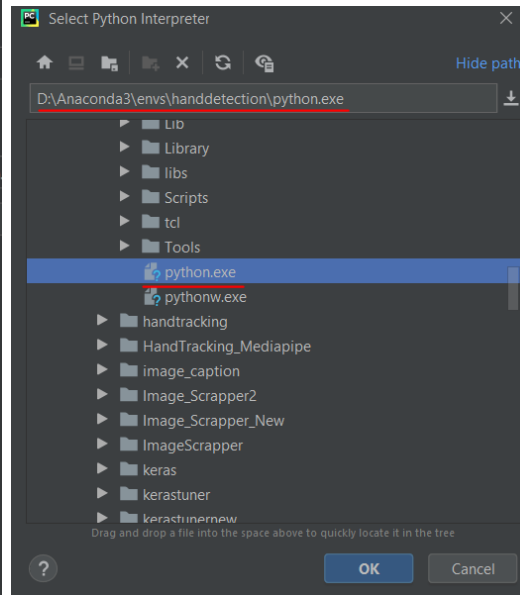

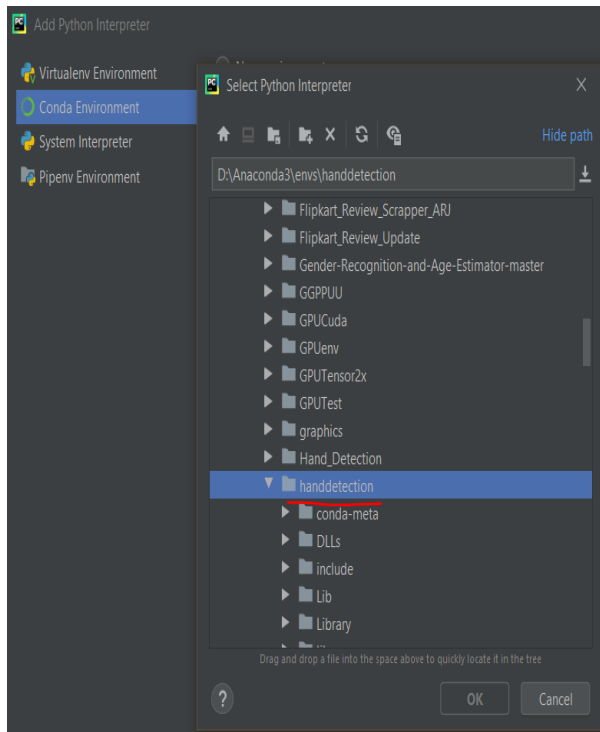

Click File → Click settings

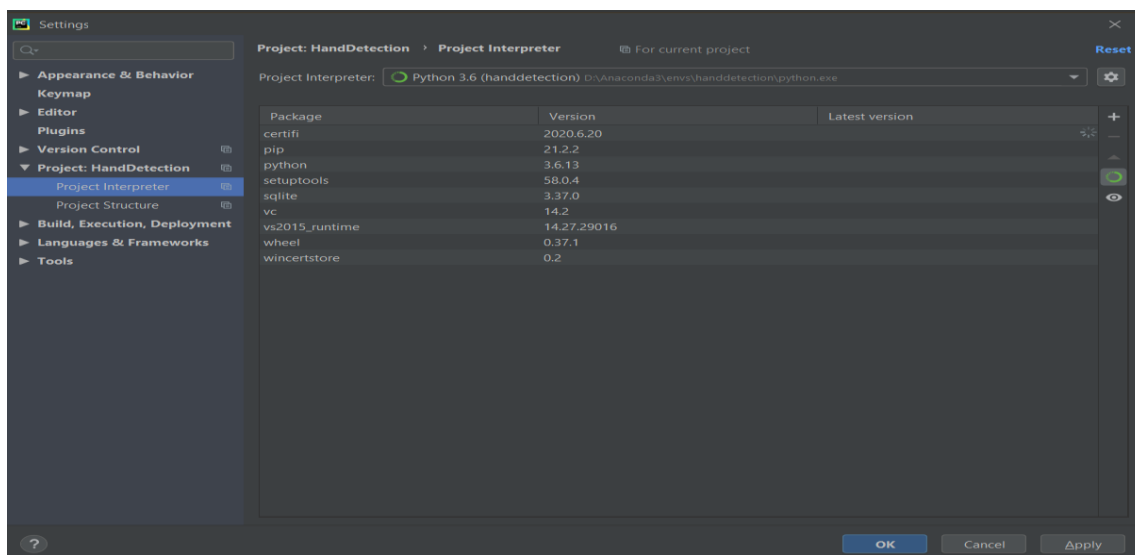

Select the project → select project interpreter → click the gear icon on the top right hand side → click add

Select the environment that you have created → under the environment you can see the python.exe file → choose the file → click ok

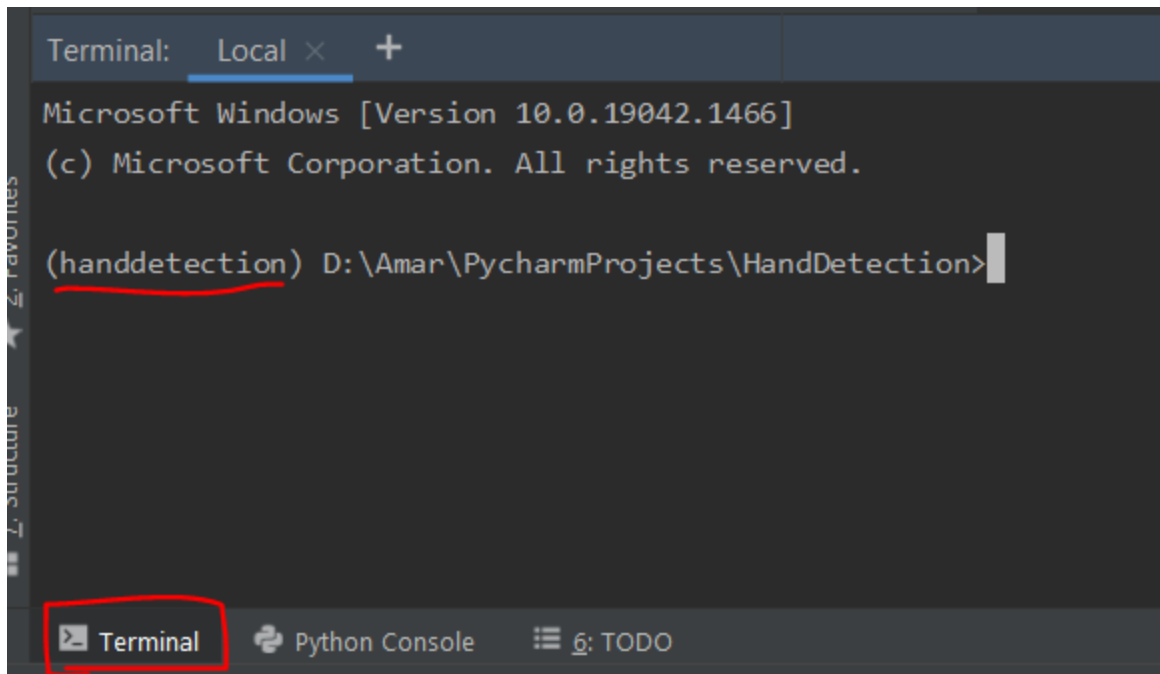

Finally click ok and apply

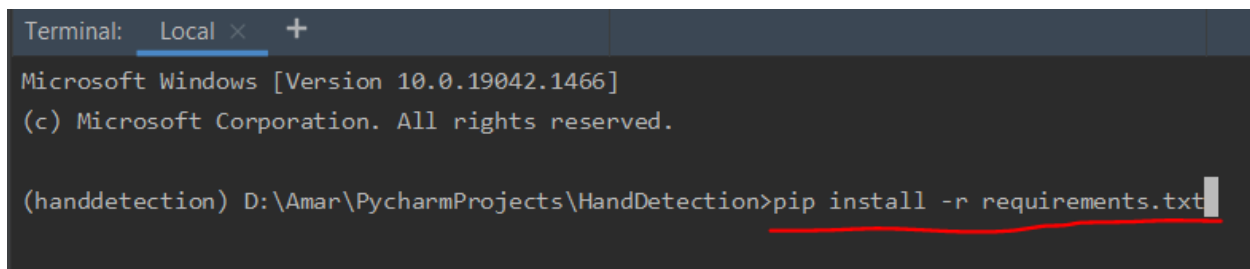

Install the dependencies:

Click terminal on the lower left-hand side

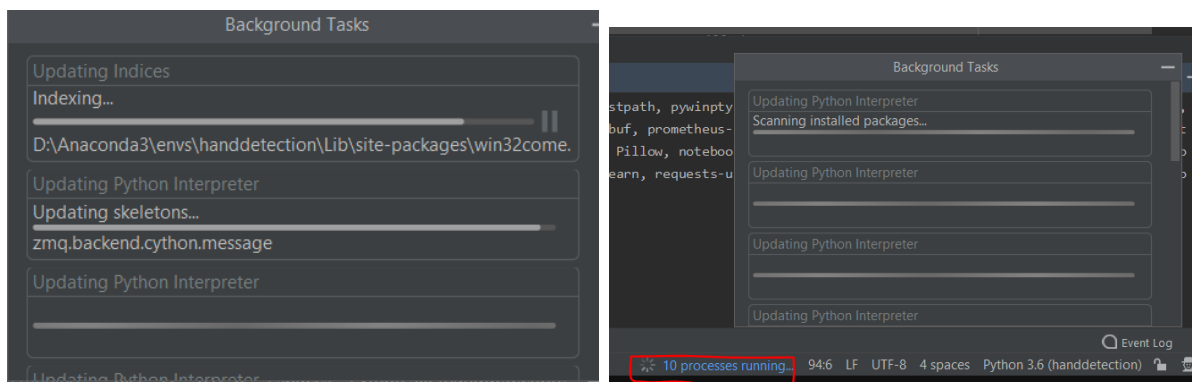

Make sure your environment name that you have created is shown here. So we are ready to go further, if not shown you did some mistake while choosing the environment

Install the requirements

Indexing operation will start to run. Wait till it completes that indexing operation

Now our dependencies are installed successfully and our indexing operation also done.
